A concept map is a graphical tool for organizing knowledge. Concept maps show relationships between concepts in a way similar to how road maps represent locations of highways and towns.

(PDF) Concept Mapping - ResearchGate

A mind map is quite a straight forward tool, where you take a central concept, and then draw out subconcepts. So, for example, for this article, I could write "mind map article" in the middle of the page, then draw lines out from there and create subnodes with all the headings I'll use in this article.
