Download Free Bond Energy Pogil

The bond energy for a particular type of bond can vary from one molecule to another because the atomic environment of a bond can influence the amount of energy needed to break the bond. For example the carbon-carbon bond in the two molecules shown below may not have the same bond energy because the surrounding atoms are

different.

Bond Energy - Mrs. allen's chemistry class

It takes roughly 100 kcal of energy to break 1 mol of C-H bonds, so we speak of the bond energy of a C-H bond as being about 100 kcal/mol. A C-C bond has an approximate bond energy of 80
