All our cacti are nursery grown from seeds and cuttings and are not collected from the wild.

Cacti And Succulents For Sale | High Country Gardens

The heat-loving cacti put on a lot of radiant new growth during the summer while some of the succulents slow down their growth. Then, the cooler temperatures of autumn and winter put the majority of the cacti to rest for dormancy, while it wakes up the other succulents for their growing season and most intense colors.

California Nursery Specialties - Cactus Ranch - Cacti and ...

However, in botanical terminology, cacti are succulents, but not the reverse as many succulent plants are not cacti. Cacti bear true spines and appear only in the New World (the Western Hemisphere), and through parallel evolution similar looking plants evolved in completely different plant families in the Old World without spines, a distinct ...

Succulent plant - Wikipedia

Fertilize your succulents at least once a year. The plants benefit most from fertilizer in the spring (when the days get longer and new growth begins), and again in late summer. Use a balanced, all-purpose, water-soluble fertilizer (such as 8-8-8 or 10-10-10) diluted to half the strength recommended on the package instructions.

How to Water Succulents: Complete Beginner's Guide

Christmas Cactus (Schlumbergera bridgesii) is a popular, winter-flowering houseplant that makes a great addition to nearly any indoor setting. It is not only easy to care for but propagates easily, too, making it an exceptional candidate for holiday gift giving. Let's look at how to plant a Christmas cactus and care for it.

How To Care For A Christmas Cactus Houseplant

A cactus (plural cacti, cactuses, or less commonly, cactus) is a member of the plant family Cactaceae, a family comprising about 127 genera with some 1750 known species of the order Caryophyllales. The word cactus derives, through Latin, from the Ancient Greek word κάκτος (kákτος), a name originally used by Theophrastus for a spiny plant whose identity is now not certain.

Cactus - Wikipedia

Lithops hail from southern Africa or South Africa, where you'll find cacti like Split Rock Succulents or Senecio Haworthii. They are found in very arid regions, some of which receive less than 4 inches of rain a year! This is the driving factor in why they look so strange - water conservation. ...
