Changes In The Land Indians

Ecosystems are never actually inert, even without human interaction, and some ecological changes are due to climatic changes, disease, drought, and natural fire. These changes are more negligible, and Cronon showed how the Native Americans and Europeans both distinctly altered the environment.

Autotemplate - Summary Changes in the Land: Indians ...

Chapter 7 in Changes of the Land was one of the most important chapters of the book because it discusses the "intended" functions of European regulations on cattle, fences and agriculture. Although Europeans may not have intended for their livestock to drastically change the landscape and further push Indians onto desolate lands, their regulations and laws that were often governed in English terms did so.

Chapters 7&8 of William Cronon's "Changes in the Land ...

He describes how the Indians lived off of the land, but juxtaposes it against the drastic changes implemented by the Europeans, such as laying claim to the land. Through Cronon, the Indians appear naïve, often unaware of what participating in a European system entails. He writes, "The Indians, not realizing the full ramifications of what that market meant, and finally having little choice but to participate in it, fell victims too."

Changes in the Land by William Cronon - Eco Books

The Indians were very close to nature, and so that meant that any changes in nature would be changes in the Indians. Land The Indians thought of land very differently to the white man. The land was sacred, there was no ownership, and it was created by the great spirit.

How Did The Environment Affect The Native American Indians ...

Changes in the Land by William Cronon Quotes: It is the same with respect to their trees: the pines, the cypress, the firs, are all included under the general name of the 'pine trees'. Pg. 8 More confusing still could be the natural tendency for colonists to apply European names to American species which only superficially resembled their counterparts across the ocean.
