SEX/GENDER. Although the terms sex and gender are often used interchangeably, they, in fact, have distinct meanings. Sex is a classification based on biological differences—for example, differences between males and females rooted in their anatomy or physiology. By contrast, gender is a classification based on the social construction (and maintenance) of cultural distinctions between males ...

This chapter addresses the important question of why young people begin to use tobacco. The immediate and long-term health consequences of use have been extensively documented over the past 50 years. Why anyone would begin to smoke or use smokeless products may therefore not seem “rational.” This chapter (and Chapter 5, “The Tobacco Industry’s Influences on the Use of Tobacco Among ...
