Worldwide, schizophrenia is one of the top 20 causes of disability. The lifetime prevalence of schizophrenia is estimated to be approximately 0.7%, although findings vary depending on the study location, demographic characteristics of the sample, the approach adopted for case finding, the method employed for diagnostic confirmation, and the diagnostic criteria used.

American Psychiatric Association Practice Guidelines

The concept of alternative medicine is problematic as it cannot exist autonomously as an object of study in its own right but must always be defined in relation to a non-static and transient medical orthodoxy. It also divides medicine into two realms, a medical mainstream and fringe, which, in privileging orthodoxy, presents difficulties in constructing an historical analysis independent of ...
