How Can We Live on Mars? - Universe Today

In this article, we'll take a look at some of the technologies that could enable humans to live on Mars. Human colonization of Mars has been a popular theme in science fiction for decades. But, in recent years, the possibility of sending humans to live on Mars has become very real.

Can Humans Live on Mars? The Technology That Can Make It ...

It sounds like science fiction, but journalist Stephen Petranek considers it fact: within 20 years, humans will live on Mars. In this provocative talk, Petranek makes the case that humans will become a spacefaring species and describes in fascinating detail how we'll make Mars our next home. "Humans will survive no matter what happens on Earth," Petranek says.

LANDING ON MARS. Starship will enter Mars' atmosphere at 7.5 kilometers per second and decelerate aerodynamically. The vehicle's heat shield is designed to withstand multiple entries, but given that the vehicle is coming into Mars' atmosphere so hot, we still expect to see some ablation of the heat shield (similar to wear and tear on a brake pad).
