Journal Of Evolutionary Biology

Evolutionary biology is the subfield of biology that studies the evolutionary processes (natural selection, common descent, speciation) that produced the diversity of life on Earth. Simply, it is also defined as the study of the history of life forms on Earth. Evolution is based on the theory that all species are related and they gradually change over time.

Developmental biology. Journals publish evidence * Before publishing, a journal will send a manuscript to other scientists who review and critique it. * Peer review process often rejects manuscripts because there is not enough evidence to support the claims of the author. Science publishes less than 7% of submissions.
