GitHub - tdunning/MiA: Mahout in Action Example Code

Apache Mahout(TM) is a distributed linear algebra framework and mathematically expressive Scala DSL designed to let mathematicians, statisticians, and data scientists quickly implement their own algorithms. Apache Spark is the recommended out-of-the-box distributed back-end, or can be extended to other distributed backends. Mathematically Expressive Scala DSL

Apache Mahout

After a brief introduction to what Mahout is, Mahout in Action is split into three main parts, covering recommendations, clustering and classification. Each section starts with an introduction to the topic and moves through to a complete solution. One thing to be aware of is that the code in the book was written for and tested with Mahout 0.5.

Mahout in Action [Book]

Mahout in Action. When computers harness prior experience to improve future performance, a type of artificial intelligence called machine learning has been applied. The Apache Mahout project is focused on three types of machine learning that are of particular interest to modern web developers "recommendation systems, classification, and clustering.

Mahout in Action by Sean Owen - goodreads.com

Since Mahout is developing pretty quickly, the lack of this being in the book is no fault of the authors, I'm just putting it up here so that people are aware that Mahout has more to offer, even if the three "C's" are the most popular. All in all, Mahout in Action is an excellent introduction to the project.
