Decision Making in Java helps to write decision driven statements and execute a particular set of code based on certain conditions.. The Java if statement is the most simple decision-making statement. It is used to decide whether a certain statement or block of statements will be executed or not i.e if a certain condition is true then a block of statement is executed otherwise not.

Java if statement with Examples - GeeksforGeeks

The if statement alone tells us that if a condition is true it will execute a block of statements and if the condition is false it won't. But what if we want to do something else if the condition is false. Here comes the C/C++ else statement. We can use the else statement with if statement to execute a block of code when the condition is false.
