Chemistry - ThoughtCo

The only things in the universe that are not physical are abstract concepts such as love and faith. All chemical processes are physical, as are all biological, geological, astronomical, gravitational, subatomic, and nuclear processes. The book "Misconceptions in Chemistry" by Hans-Dieter Barke states:

What is the difference between a chemical process and a ...

Chemistry can be described as the combination of "love, lust, infatuation, and a desire to be involved intimately with someone". [58] Research suggests that "not everyone experiences chemistry", and that "chemistry occurred most often between people who are down-to-earth and sincere".
