If you do this, then work = force x distance in this case also. In the previous example, you would say work done = force x distance = (- 5 Newtons)(2 meters) = -10 Joules. It really doesn't matter which method you use - just be consistent, and remember that if the direction of the force is opposite to the direction the object moves, the work done by the force is negative.

### Work

We believe automation should be easy, because everyone deserves to work smarter—not harder. How Zapier helps you automate. Create workflows called Zaps. Zaps connect your apps to automate repetitive tasks, so you can focus on other work. That's why Zapier rhymes with happier! Trigger.

### How Zapier Works

If the LED light on your Surface charger is blinking, flashing, off, or on (but your Surface still isn't charging), here's what to do: Check cables and reset your power supply unit: Disconnect the charger from your Surface, unplug the power cable from the electrical outlet in the wall, and then disconnect any USB accessories. Wait 10 seconds.

### What to do if your Surface power supply or charger doesn't ...

'Save your work every once in a while' is an oft repeated phrase. However if you are one of those brave souls who believe in saving only at the end of the job then you are in deep trouble when Word crashes/hangs. Yet, you may be able to recover it or at least some part of it. To do this: Open the Tools menu.
