If no domain name is entered, then all 856s in the matching item are delivered in the record so you could have a record with a lot of 856s you don't want. Domain names must be entered correctly, without any typing errors.

Why are there either no 856 URLs or multiple 856 URLs in ...

There is no culture, no language, no group of people who can deny this (Psalm 19:3). But equally clear is the fact that human beings often reject the truth about God (because accepting it means things like submission and obedience) and choose instead to go their own way, seeking God according to their own way of thinking, which is futile ...
